 - **React Skills:** Functional Programming, State Management, Responsive Design, Api Integration
 - **Developer Tools:** VS Code, GitHub
-

PROJECTS

React Ecommerce Website:

Our React JS E-Commerce project features seamless navigation with React Router, Toastify notifications for user feedback, and dynamic data fetching for real-time product updates. Users can easily add products to their cart, proceed to checkout, and enjoy a smooth shopping experience.

Pizza App:

Introducing my Pizza App, a flavorful blend of React and Bootstrap, designed to showcase my skills in web development. The app features a streamlined navigation system with NavLink functionality, guiding users seamlessly through the Home, About, Menu, and Contact Us sections. The React framework ensures a smooth and responsive user interface, enhancing the overall experience. Leveraging Bootstrap's components, the design achieves a modern aesthetic while maintaining a focus on functionality.
